Subject: Weston HTC Removal TDD
Holy Trinity Removal TDD Request 03-25-2016.docx

FYI

Good Afternoon:

Attached is the new removal TDD for HTC.

Also, I would like to add 100 hours to the existing HTC Assessment TDD. I am not sure if the scope of work needs revising since we performed similar work in the summer. We will be conducting gamma survey of specific areas at HTC with Two (2) Ludlum 2241, Model 44-10 with 3"x3" NaI probes (Provided by EPA) as well as taking static readings in designated areas with Two (2) RSS-131 HPIC units. This work will begin on April 18, 2016.

Thanks

Regards,

Eric
